

SHAMMY KENAN DIN

Backend Developer | PHP · Laravel · PostgreSQL

Valenzuela City, PH · dinshammykenan012@gmail.com · 09941628327 · linkedin.com/in/shammykenandin · github.com/shammykenan

Backend-focused web developer with production experience in PHP, Laravel, and PostgreSQL. Built and shipped a company-wide reporting system now used daily across six departments, plus two independent PHP/MySQL applications carried from schema design through deployment.

EXPERIENCE

Web Developer Intern — Upturn Business Solutions

Valenzuela City, PH

May – Aug 2026

Internship · 500 hrs

Stack: Laravel, Blade, PostgreSQL, Railway, Git & PR Review, Brevo SMTP

- Sole developer on the **EOD Reporting System**, a Laravel/PostgreSQL platform replacing the firm's Google Form — now handling **300+ reports a week** from **60+ users** across all 6 departments and still running after the internship ended.
- Built a **compliance engine** that automatically flags on-time, late, and missing reports around approved leave, holidays, and weekends, removing manual follow-up for supervisors.
- Ran a PR-reviewed Git workflow with staging and production deploys on Railway; added Excel/PDF export and audited reporting-line transfers.
- Consolidated 4 admin screens into one configuration area and loaded the firm's full catalogue — **100+ clients and 1,000+ projects** — before go-live.
- Also supported company-wide IT — hardware troubleshooting, account provisioning, and biometric attendance — across all 6 departments.

TECHNICAL SKILLS

Languages PHP (Proficient), SQL (Proficient), JavaScript (Familiar)

Frameworks Laravel, Blade

Databases PostgreSQL, MySQL

Web / UI HTML, CSS, Bootstrap

Tools Git, GitHub, Composer, Railway, XAMPP, Laragon

Concepts MVC, RBAC, Session Auth, CSRF Handling, Audit Trails, Compliance Logic, Rate Limiting

PROJECTS

SKD Point of Sale

Stack: PHP (MVC), MySQL, Bootstrap, Brevo SMTP, ESC/POS

- 3-role system (Admin, Cashier, Kitchen) handling the full order lifecycle with item variants, modifiers, and kitchen dispatch; recipe-based inventory deduction updates stock automatically per product composition on each sale.
- BIR-compliant invoicing — OR numbering, VAT computation, and daily Z-reading reports.
- ESC/POS thermal printing with browser-based fallback; deployed on shared hosting with a customer-facing menu page and QR WiFi modal.

Grease Monkey — Inventory Management

GitHub

Stack: PHP (MVC), MySQL, Bootstrap, Composer, Brevo SMTP

- Developed an MVC inventory app for automotive parts — SKU tracking, stock logs, audit trail, and category management.
- Added email notifications, auth rate limiting, activity logging, and one-click database backup/restore; published with full setup documentation and a live demo account.

PHP E-Commerce Platform

Stack: PHP, MySQL, Bootstrap

- Built product catalog, cart, and order processing with complete frontend-to-backend data flow.

EDUCATION

Bachelor of Science in Information Technology — Datamex College of Saint Adeline, Valenzuela City

Expected 2027
